

STINGRAY LED SMART SURFACE MOUNT USB with C

Part # SNC-Stingray II

Stingray Led Smart Surface Mount USB

-They have LED lit ports so they promote themselves and make it easier for your customers to see and use the new service you provide. Has both USB A and USB C sockets.

-They are 100% compatible with all USB charging devices included Samsung Tablets.

-Includes Stingray and a quick disconnect cable. This makes it easy to service. You can easily replace or change just the Stingray.

- They eliminate the liability you would have from putting 110v outlets accessible by customers as they drink at your bar. You only expose your customers to a harmless 5v (same as a flashlight).

- Mounts with 3M VHB included.
