

PD3 120 WATT CHARGER WITH 6 USB PORTS

Part # SNC-6PORTPD3

PD3.0 Premium 120 watt, 6 USB port charger

It can power any of the Sit N Charge PD3.0 USB products. This charger was specifically designed and built with 6 independent transformers inside the 120 watt unit, so there is no power sharing.

Each individual USB port gets 100% of 20 watts per channel.

This charger also has a locking bar across the front that will lock in all 6 special USB cables that were designed for it, eliminating cables from pulling out. It was designed from the

ground up to be used in commercial applications where you don't want cables and cords to become disconnected, eliminating service calls. All SNC kits will include this charger. LED lights have been added to charger for blind installs.

Reference	# SNC-PD36PORT
